SKILLS

Mobile App Development:

- Building native and multi-tasking apps with Flutter, including restaurant booking apps, school apps, and chat apps with data synchronization.

Java Development:

- Solving complex problems using Java, including building complete software systems such as ATM machines, boat rental systems, and school management software.

Python & Python Flask:

- Developing backend solutions using Python and Flask, including AI model integration and backend web applications.

Backend Technologies:

- Firebase, SQL, SQLite, Hive, PHP

Ethical Hacking:

- Penetration testing

Networking:

- Network configuration

EXPERIENCE

Superest App

- Developed the complete software for Superest, a Nigerian delivery company offering vendor and logistics services, using Flutter and Firebase.

FMS (Financial Management System App)

- Built an application to manage and track users' monthly expenses, focusing on seamless UI and data synchronization.

IPPM

- Created an Islamic app guiding visitors to Saudi Arabia for Umrah or Hajj, featuring AI-based navigation and Q&A functionalities, developed using Flutter and Python.

Store Management System

- Built a Java-based desktop application for managing store inventory and sales.

Hotel Management System

- Developed a web-based hotel management system using Python and Flask.

EDUCATION

- **Aptech School**: (ADSE)Advanced Diploma in Software Engineering (2020–2021)
- **Randatech**: Ethical Hacking
- **Dialogue Computer Institute**: CCNA, Linux Server, Azure
